

FACILITATOR MENTIMETER IN-CLASS QUIZ INSTRUCTIONS:

A fun, interactive self-reflection activity to get your brain warmed up with a few knowledge questions. This is not a formal evaluation. If you'd prefer to remain anonymous, the platform automatically generates fun names and avatars for you.

Open browser (Edge) and go to: [Pediatrics CME Quiz - Mentimeter](#)

IF it asks you to **login:** education@rppeo.ca

Password: CME12345!

Select the quiz that matches the service you are teaching for, you can use the arrows to scroll through the different in-class pediatric CME quizzes.

There will be 9 different ones for each paramedic service – **choose the service you are teaching at, ex: “Cornwall CME”** (they are all different QR codes so that when multiple services are running at the same time, you will not get an error message).

Go to “start presentation” in blue top right corner ***Make sure you see a QR code on the screen for players to join, if you don’t then refresh or go back and try again!***

Show the class the QR code for them to join on phones.

- Once everyone is ready, click “start quiz” on the bottom left-hand corner.
- You will need to click through these slides the whole time (arrows, “start-quiz”, “leaderboard”) as it is not self-paced and the answers follow the questions on a separate slide.
- It will tell you once everyone has answered or it will time out after 60 seconds (wait a second for “correct/incorrect” to appear on their phones) then you will know when to click next. Let them have a few seconds to read the answer and then continue (“start quiz” for each question – bottom left).
- Every few slides there is a “leaderboard” so it will show them on their phones what place they are in. The quicker they answer the more points they get for fun! Again, give it a few seconds when you click “leaderboard” in the bottom left corner to show them their place on their phones.
- When FINISHED – please clear the results at the top of the screen when you exit the presentation. It will show, “You have results from x participants.” Clear results and click CONFIRM before presenting at another CME. Also ensure you are back on the first slide before starting the presentation again as it will pick up on whatever slide you are on.
